

MUNICIPALITIES

HORIZON

Project Name

Municipal Courts Complex Civic Center • City Hall

Owner/Client

City of Bellaire, Texas

The City of Bellaire Municipal Building Complex is two separate facilities connected by a covered breezeway. The 22,750-SF Civic Center and City Hall is 2-story and contains designated space for city hall administration, offices, a senior outreach program, community meeting areas, and several city departments. The goal of the project was to create a lively, inviting, and active facility for city residents to gather for civic events. Maximizing flexible meeting space for city departments, programs, and residents to use—keeping costs down and minimizing the square footage—allowing for more green space to be preserved. Versatilely designed to be divided into as many as three multi-purpose spaces, or to be combined as a single open gathering space, the Center accentuates views of the Town Square. Designed to be highly-secure, flexible, sustainable, and is a highly-functional space.

This project is • LEED Silver Certified by the USGBC
