[Horizon completes the renovation on 1114 Texas Avenue, Houston, TX 77002, Hyatt Place]

[HOUSTON, TEXAS, January 6, 2020—] Horizon completed the historical renovation for the Texas Avenue Hyatt Place in Downtown Houston.

The building itself is the former Southwestern Bell Capital/AT&T Building and is a Historical Landmark through the National Register of Historic Places. Due to this the demolition and restoration was incredibly unique and carefully executed. The exterior remained the same, with the exception of a facelift. The interior carries notes of the original building, including select flooring and doors.

The hotel features sweeping views of Downtown Houston from every angle, with a bar a mid-century modern bar beckoning visitors to stay awhile and take in the view. The artwork is cleverly executed cable and retro telephone installations, nodding to the building's past. As guests tour the halls and relax in seating areas, they are treated to a history lesson of the building and Houston.

The construction project featured demolition of all 16 floors, interior buildout of all guest rooms, meeting spaces, full kitchen and dining, lounge areas and backhouse functions.
